Halloween Costume Safety

- October 31 can be a chilly night so make sure that costumes are loose enough to be worn over warm clothing but not so baggy or long that trick or treaters can trip over their costumes.
- Trick-or-treaters should wear sturdy walking shoes.
- Choose brightly-coloured costumes that will be clearly visible to motorists. For greater visibility, add or incorporate reflective tape into the costume.
- Make-up and face paint are better than wearing masks which can restrict breathing and/or vision. If you choose to use a mask make sure it is one that allows the child to see and breathe easily.
- Look for costumes, beards and wigs labeled "Flame-Resistant" -- nylon or heavyweight polyester costumes are best. Flame Resistant does not mean 'fire proof'. Avoid costumes with baggy sleeves or flowing skirts to minimize the risk of contact with candles and other fire sources. Costumes made of flimsy materials have been found to burn more quickly when exposed to fire sources.
